

Aggregation in SQL

Assignment Solution

Use "World" Database to solve the following questions

(**Hint :** World Database is inbuilt in SQL Workbench so use code "use world;" to make use of the database)

Question 1 : Count how many cities are there in each country?

Question 2 : Display all continents having more than 30 countries.

Question 3 : List regions whose total population exceeds 200 million.

Question 4 : Find the top 5 continents by average GNP per country.

Question 5 : Find the total number of official languages spoken in each continent.

Question 6 : Find the maximum and minimum GNP for each continent.

Question 7 : Find the country with the highest average city population.

Question 8 : List continents where the average city population is greater than 200,000.

Question 9 : Find the total population and average life expectancy for each continent, ordered by average life expectancy descending.

Question 10 : Find the top 3 continents with the highest average life expectancy, but only include those where the total population is over 200 million.
